PROFESSIONAL EXPERIENCE

Zycus Infotech Pvt Ltd

Mumbai, India

Trainee Software Engineer

January 2021 - April 2021

- Gathered business requirements and executed feature development and bug fixes for 30 components in DewDrops CoE
- Developed Global Delivery and Customer Relationship Management System Dashboard for consumption by management
- Collaborated with product and app teams for embedding components from the component library into the products
- Implemented Proof of Concept and Feasibility Check for 2 components
- Implemented Java 11 and removed dependencies on public repositories upgrade for Language Management System
- Triggered and monitored CI/CD pipelines to intermittently deploy beta and stable versions

Associate Software Engineer, Centre of Excellence Team

April 2021 - August 2022

- Implemented UI theme for AppXtend platform pages, developed and enhanced launch points and manifestation areas
- Contributed to and Authored documentation for components, dashboards, and 2 processes
- Liaised between UX design team & development team to check viability of design decisions
- Implemented design changes in all components of component library with cognizance of best practices for consumer-grade UX
- Researched on the icon library, their optimizations, and authored instructions for designing optimized icons
- Created an automation script for generating icons eliminating half-day manual effort and the scope of human error
- Implemented enhancements in the Performance Evaluation Dashboard to get granular visibility of all products
- Trained Eight resources through Knowledge Sharing & Knowledge Transfer sessions
- Earned Zycus individual recognition award for performance and agility twice

VOLUNTARY & INTERNSHIP EXPERIENCE

- Founding member and core team member of TAPtheTECH (NGO, YouTube Channel & Coursera Learning Hub)
- Volunteered at Teach For India project under Teach to Lead Foundation, September 2020 to December 2020
- Mentored school students for AR/VR, Android, and Web Development at CampK12, April 2020 to May 2020
- Interned in Website development for a Bootstrap-based project at Fube Technology, December 2018 to March 2019
- Interned in Android and Python application development at Trivia Software, July 2018 to August 2018
- Interned in WordPress Administration and SEO Management at Toppr, February 2018 to June 2018

SELECTED PROJECTS

Angular Assessment Project

2021

Angular web application fetching data from APIs and displaying profiles of fictional users along with their details, posts, and photos after logging in utilizing components from angular material and hosted it with firebase

Real-Time Bridge Health Monitoring System - Undergraduate Capstone Project

2019 - 2020

A comprehensive IoT project for Bridge Health Monitoring comprising sensors for checking vibrations and bending on structure, Python Applications for Image & Audio Processing, and a Cross-Platform Progressive Web Application for displaying intelligible results to authorized users and hosted the application using firebase

PUBLICATION

"Survey on IoT-based Bridge Health Monitoring Systems", IJRESM Journal (ISSN - 2581-5792), Volume-3, Issue-4, April 2020
